Terrible Storm.

Last week one of the most disastrous storms recorded in history, swept over the coast of the Gulf of Mexico, from Texas to Florida, carrying death and destruction in its wake. The storm broke without warning, and ere it subsided had spread ruin and loss of life on every side, completely wiping out some of the small villages south of New Orleans, wrecking shipping and leaving the country along the coast in a most deplorable state. At one point, Chemere Caminda, of a poppoint, Chemere Caminda, of a population of 1,800, over 1,200 lives were lost, while at other points the losses were almost equally appalling. The loss in the entire stricken district will doubtless reach 2,500, while the destruction of property will not fall short of \$5,000,000.

The fifth statistical report of the Interstate Commerce Commission, lately made public, shows that the railway mileage of the country on June 30, 1892, was 171,563 Schooner Barge Ge miles, being an increase during the yearof 3,160 miles. This is the smallest increase in railway mileage reported for a number of years. The total number of Barge Brake, \$10,000 lumber railway corporations was 1,122, berailway corporations was 1,122, being a net increase of 37 during the year. The total number of locomotives was 33,136. The total mount of lumber and other products shipped from the port of Alpens since the opening of navigation in April, 1893, by vessels that reported at the custom house, is as follows: number of cars reported by carriers as their property was 1,215,092. These figures show a decided increase in the density of rolling stock over passengers carried per passenger locomotive was 63,399. The num-

The reports of the United States Agricultural Department upon the adulteration of various articles of food furnish instructive and reliable information relative to many products in daily use as to the purity of which the public have here-tofore had little knowledge, and there is no work of the Government of more real, no work of the Government of more real, practicable service to the whole people than this. The report upon the subject of baking powders alone, giving information as it does so closely effecting the daily diet of almost every one of our sixty-five millions of people, is worth the cost of the whole department for a year. This report effectually exposes the dangerous character of most of the articles sold as baking powders, and without hes. The tariff on wool makes a good market for shoddy and does not help the raiser of wool. Give us honest trade and no favors.—Kalamazoo Gazette.

The Michigan Agricultural college has revised its course of reading for farmers, gardners, fruit growers, inches.

These facts are very suggestive to the practical housekeeper. They indicate that the Royal Baking Powder goes more than 33 per cent. further in use than the others, or is one third more economical.

No Other As good. This is the statement of Pro-lessor Smith, Analytical Chemist: I have analyzed all of the popular blood purifiers and medicines now sold. Many of them I found to be worthless, some dangerous to use. Sulphur Bitters contains nothing poisonous, and I think it is the best blood purifier made.

Ely's Cream Balm has cured many cases of catarrh. It is in constant demand.—Geo. W. Hoyt, Pharmacist, Cheyenne, Wy.

When catarrh attacks a person of scrofulous diathesis, the disease is almost sure to become chronic. The only efficacious cure, therefore, is Ayer's Sarsaparills, which expels scrofula from the sys-tem and the catarrh soon follows suit.

Probably the most original and force-ful plea for silver that has been made in this exciting campaign, where so much has been said, is advanced in the October has been said, is advanced in the October Review of Reviewsby Edward B. Howell. By means of carefully prepared charts showing the amounts of silver and gold, of cereals and cotton and other staple products he aims to show that the production of silver keeps approximate pace with the products of cereals crops. Furthermore, his evidence goes to show that while silver does vary about as the goods which we buy with it gold does not keep pace with them. In other words, Mr. Howell's very interesting arguments would lead to the conviction that we should be talking of a \$1.50 gold dollar instead of a \$0.60 silver dollar. While put forward in a very concise and unpretentious manner, the charts which this young Western political economist has prepare form a very valuable addition to the literature of the much-vexed currency question.
